

TECHNICAL DATA SHEET

CHRYSOFORMX-100 (Neat Cutting Oil)

Description:

Chrysoformx-100 oils are active neat cutting oils manufactured from highly refined base oils and fortified with extreme pressure additives and contain rust and oxidation inhibitors.

Applications:

These products are recommended specially for Cold heading operation in fastener companies which require very high speed on components. These oils have fatty oil and active Sulphur and therefore are not suitable for yellow metal.

Specifications:

Chrysoformx-100 Oils are propriety products of Chrysol Petrochem.

Key Performance Features and Benefits :

- Improves tool life and provides excellent surface finish.
- Provides higher cooling even at high cutting speeds.
- High Thermal and Oxidative stability ensured prolonged operating life
- Minimizes sludge formation. Excellent cutting performance due to their special additive packages.
- Effective tool and work-piece coolant.
- Resist objectionable oil misting.
